

Spring makes Java simple.

[WHY SPRING](#)[QUICKSTART](#)[NEWS](#)[State of Spring Survey Results 2024](#)

What Spring can do

```
@SpringBootApplication
@RestController
public class DemoApplication {

    @GetMapping("/helloworld")
    public String hello() {
        return "Hello World!";
    }
}
```

Level up your Java™ code

With [Spring Boot](#) in your app, just a few lines of code is all you need to start building services like a boss.

New to Spring? Try our simple [quickstart guide](#).

Most [of our] services today are all based on Spring Boot. I think the most important thing is that [Spring] has just been very well maintained over the years...that is important for us for the long term because we don't want to be switching to a new framework every two years.

Paul Bakker, Senior Software Engineer, Netflix
