Abstract class names should comply with a naming convention

Code Smell

Strings literals should be placed on the left side when checking for equality

Code Smell

Files should contain an empty newline at the end

Code Smell

Source code should be indented consistently

Code Smell

A close curly brace should be located at the beginning of a line

Code Smell

Close curly brace and the next "else", "catch" and "finally" keywords should be on two different lines

Code Smell

Close curly brace and the next "else", "catch" and "finally" keywords should be located on the same line

Code Smell

An open curly brace should be located at the beginning of a line

Code Smell

An open curly brace should be located at the end of a line

Code Smell

Tabulation characters should not be used

Code Smell

Functions should not be defined with a variable number of arguments

Code Smell

Method names should comply with a naming convention

Analyze your code

Code Smell Minor ? convention

Shared naming conventions allow teams to collaborate efficiently. This rule checks that all method names match a provided regular expression.

Noncompliant Code Example

With default provided regular expression `^[a-z][a-zA-Z0-9]*$`:

```
public int DoSomething(){...}
```

Compliant Solution

```
public int doSomething(){...}
```

Exceptions

Overriding methods are excluded.

```
@Override
public int Do_Something(){...}
```
